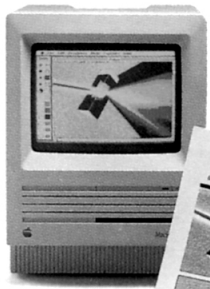
See Scanners In
A NEW LIGHT!

In the past, choosing the perfect image scanner was clearly a problem. But now Spectrum Digital Systems' LS-300 Scanner™ enters the spotlight. Its combination of speed, high resolution and dependability make it the obvious choice.

The LS-300 represents the highest level of performance per dollar. It scans photos, maps, diagrams and line art at up to 300 dots per inch. Because of its high speed SCSI interface, a full 8½" x 11" page scans in 15 seconds or less!

TrueScan™ software offers complete control of the scanning process, has many powerful image editing features, and is compatible with all major desktop publishing programs. Complete with cables and software, the LS-300 costs only $1,550.

If you've been in the dark about choosing a scanner, step into the light with a Spectrum Digital Systems LS-300.



The Spectrum Digital Systems LS-300 Scanner is compatible with the Apple® Macintosh™ Plus, Macintosh SE and Macintosh II.
